How to Print Your Download

Moose in Snow — digital print from PracticalHowTo (Etsy)

What's in your download

Files are grouped by shape (ratio). Pick the file that matches your frame size:

- 2:3 ratio - 4x6, 8x12, 12x18, 16x24, 24x36 in
- 3:4 ratio - 6x8, 9x12, 12x16, 18x24 in
- 4:5 ratio - 8x10, 16x20 in
- 5:7 (5x7 in), 11x14 in, Square 12x12 in, and ISO A4 / A3 / A2

Every file is JPG, 300 DPI, ready to print.

Printing at home

Use the file that exactly matches your paper/frame size. In your print dialog choose 'Actual size' or 100% (not 'Fit to page'), select your printer's best/photo quality setting, and use matte or luster photo paper for the closest match to what you see on screen.

Printing at a shop or online

Upload the matching-size JPG and choose the same size print. Good options: local photo labs, Staples, FedEx Office, Walmart Photo, or online services such as Mpix, Nations Photo Lab, or Printique.
Ask for matte or luster finish; glossy can glare under glass.

Colors

Screens show colors slightly differently from ink on paper, so a small shift is normal. If an exact match matters, order one small test print first before printing a large size.

License

Personal use: print as many copies as you like for your own home or to give as gifts. Please don't sell prints or share the digital files.
